

AMENDMENT TO THE SPECIFICATION

Amend the first paragraph on page 1 to read as follows:

This is a divisional of Application no. 09/048,468, filed March 26, 1998, which issued as U.S. Patent 6,496,869, on December 17, 2002.

FIELD OF THE INVENTION

The invention relates generally to monitoring the system environment of an inactive networked computer, and more specifically to monitoring network activity for specific events.
